

For Google Chrome web browser:

To always open a specific page or set of pages

- From your Chrome browser, click on the menu icon with the three dots  in the top-right corner, and then pick **Settings**.
- Scroll down to **On startup**, and then select **Open a specific page or set of pages**.
- Click on **Set pages**. From there, you can enter the URLs of whichever pages you'd like to see every time you open your browser.

To pick up where you left off

Maybe you don't want Chrome to open up the same page(s) every time. If you're the kind of person who tends to use a lot of different tabs, it might be more helpful to have Chrome open up all the tabs you were viewing when you closed it.

- From your Chrome browser, click on the menu icon with the three dots  in the top-right corner, and then pick **Settings**.
- Scroll down to **On startup**, and then select **Continue where you left off**.
